

Customizing Reports

Document #:	3075	Product:	CenterPoint®
--------------------	------	-----------------	--------------

CenterPoint allows you to customize reports to match your needs. A system supplied report can be modified to create many variations to the same report. These customized reports are saved as Favorites for future use. You can also add folders to your Favorites to organize your custom reports.

The customizing tools can be used to add or remove columns from the report, change the sort order, add or remove subtotals, change the title and page numbering, etc. All customizing is done from within the preview of an existing report. This document explains the steps used to customize a report and step-by-step instructions for many common changes.

Step B - Save Customized Report for Future Use

 Note: If a system-supplied report has security restrictions for users (you can restrict users from viewing/printing specific reports), the user will also be restricted from any favorites based on the system-supplied report. Favorites created prior to version 6.5 will need to be recreated to have security restrictions applied. See the [Users and Security](#) topic for information about creating users, user groups, and setting security policies.

1. Once a report is successfully customized, save the report as a **Favorite** by clicking on the Favorites icon  while still in the preview screen.
2. Specify a name for the customized report and click **OK**. It will then be available for future use in the Reports > Reports > Favorites tab.

Step C - Organize Custom Reports for Easy Access (optional)

1. The Favorites tab (Reports > Reports > Favorites tab) will display all reports that have been marked as Favorites. This can be system supplied reports and/or customized reports. By default, they are displayed in a flat list.

2. The reports in the Favorites tab can easily be sorted and grouped.

- » To change where in the list a report is displayed: Left click on the report and while still holding down the left mouse button, drag it to the new location in the list. Then release the left button on the mouse.
- » To group multiple reports together:
 - a. Right-click in any blank space on the Favorites tab.
 - b. Select **New Folder**.
 - c. Type in a name for the new folder and press enter on the keyboard (in this example, we named the folder "Custom Reports").
 - d. Use the same "drag and drop" process described above to move reports in to the new folder.
