Document #:	3028	Product:	CenterPoint <sup>®</sup> Payroll								
When a payroll is processed that deducts monies (taxes, child support deductions, etc.) which will in turn be paid to another party, the system will automatically create liability invoices for those amounts. This topic explains how to select these invoices for payment, print a list of the selected transactions and print the checks. Invoices can be selected for payment based on their Due Date, Discount Date or Invoice Date. The Prepayment Report allows you to review the invoices to be paid, prior to printing the checks.

- 10. Click the **Print** button. (An image of a printer displays on the button. A green check mark means the check will be printed and a red X means the check will not be printed.) The selection set in File > Preferences > Printing > Checks is will display and can be changed.. Select whether you want to immediately print a check for the payments when you click Post. To set your default for the Print button, right-click on the button and select Set As Default. To override the Print button default, click the Print button and change the settings on the Print Settings screen.

#### 11. Click **Post** to finish saving these selected transactions.

Note: If one or more negative checks are posted, a message will display that warns you so you can go back and change their sequence number to a non-check sequence number. Negative checks do not print, but they will use a check sequence number. Changing to a non-check sequence number ensures that check numbers will not be used.
